

Going Green Series: Session 1 – Garden Day

Purdue Extension – Dubois County partnered with Greenthumb Garden Center, Jasper Library, Tierra Derco and Jasper High School Drama Department to present “Going Green – Garden Day. This program provided the opportunity for 25 youth ages 3-6 to learn about planting seeds and the importance of growing vegetables and flowers. Participants completed two hands-on planting projects to take home, enjoyed a story about growing a garden and received a set of child-friendly garden tools and water can to use in gardening projects at home. The program was so well received and successful a second session has been planned and will be expanded to include programming for youth and adults.
