

# Animals from Eggs

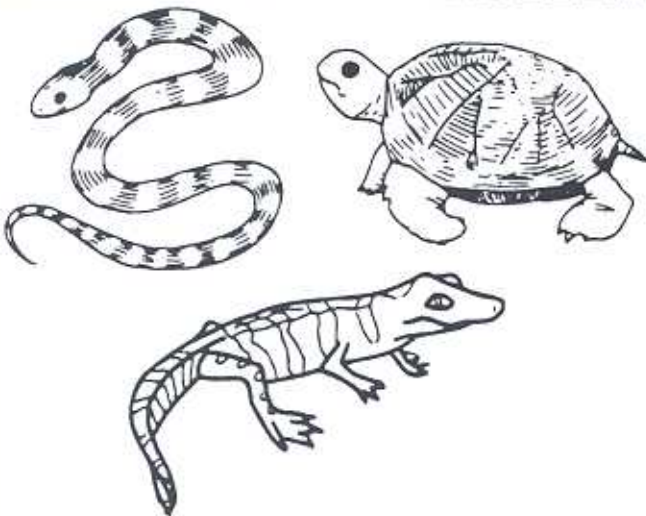

Every kind of creature makes eggs. Many lay their eggs with the baby developing inside and hatching. Other hair and fur bearing/milk producing creatures called mammals develop their eggs inside the mother and are born as babies.

1

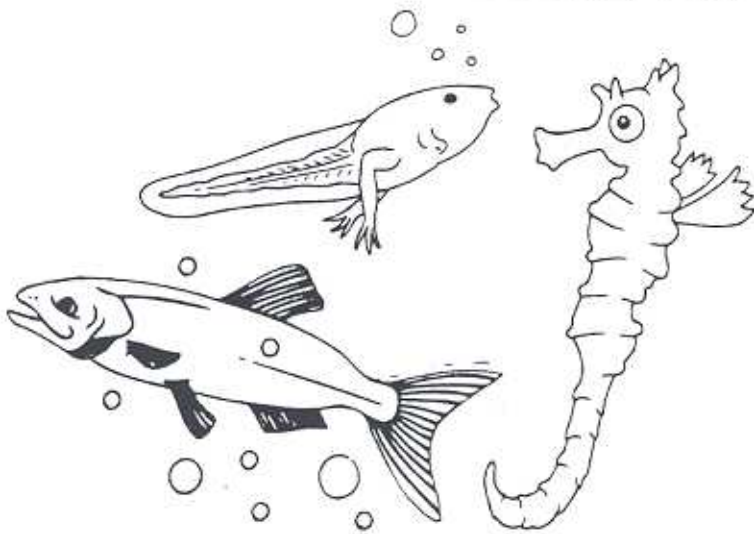

Baby birds hatch from eggs.  
Many other animals do too.

2

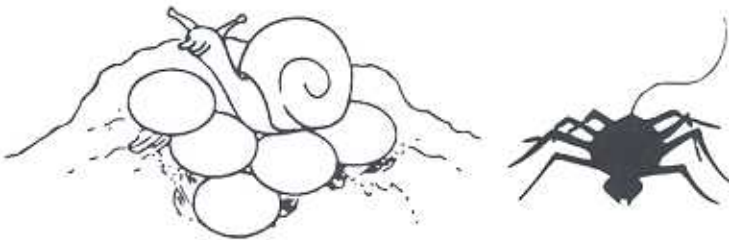

Snakes, turtles, and crocodiles  
hatch from eggs.

3

Frogs, fish and sea horses all hatch from eggs.

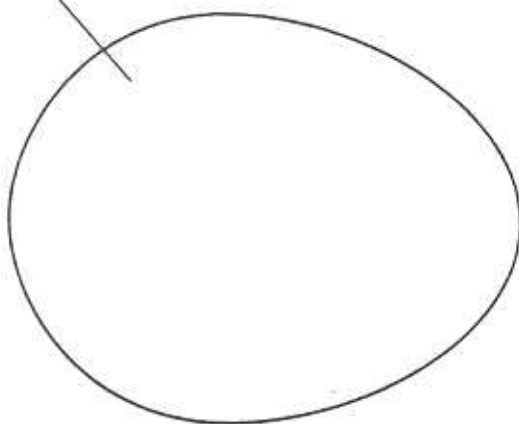

4

Snails and spiders and all kinds of insects come from eggs too.

5

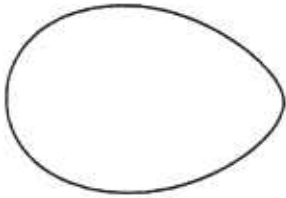

ostrich

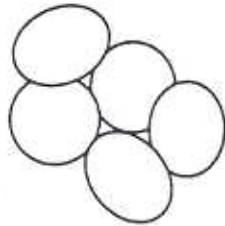

hummingbird

Some eggs are very large.  
Some eggs are very small.

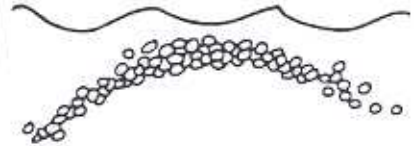

Bird eggs have  
hard shells.

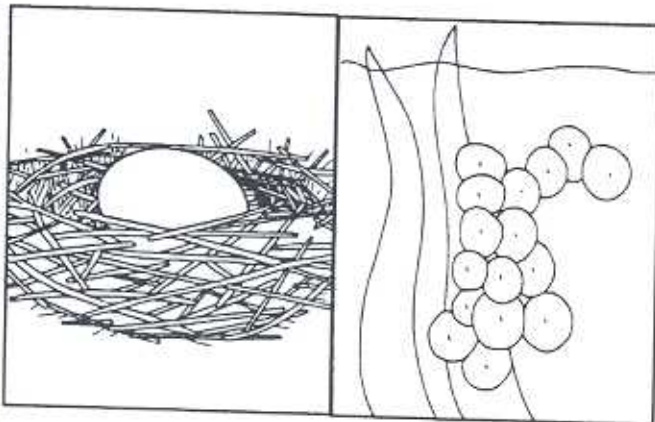

Snake shells  
are rubbery.

Fish have jelly-  
like coated eggs.

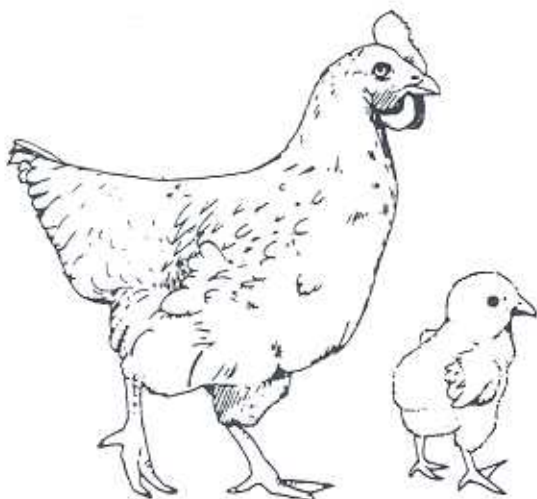

6

Some eggs are laid on land.  
Some are laid in water.  
Some are laid in large bunches.  
Some are laid all alone.

7

But when each egg hatches, out  
comes a baby that will grow up  
to look like its parents. What  
amazing things eggs are.
